Summary

Backend Engineer skilled in FastAPI, Django, Node.js, and Kafka, building scalable REST APIs and event-driven systems. Improved API response times by 25%, boosted reliability by 33%, and reduced parsing errors by 30% through optimized pipelines and HL7/Mirth Connect integration. Experienced in authentication, API design, and containerized deployments supporting 10,000+ daily requests.

Work Experience

Software Engineering Intern, InnovLogic Services Feb 2025 - Jul 2025

- Designed and developed secure REST APIs using FastAPI with JWT authentication, RBAC, pagination, and OpenAPI docs, reducing response time by 25% and supporting 10,000+ daily requests.
- Built an event-driven pipeline (EHR → Kafka → Consumer → Mirth → Orchestrator) enabling reliable healthcare data exchange, improving message delivery reliability by 33% and reducing system downtime.
- Implemented HL7 parsing, validation, ACK handling, and transformation into REST/JSON, reducing parsing errors by 30% and accelerating downstream data processing.
- Integrated healthcare CRM systems using HL7 (ORM/ORU), Kafka, and Mirth Connect to ensure seamless and scalable clinical data interoperability.
- Containerized services using Docker and docker-compose, improving deployment consistency and reducing environment setup time.

Projects

SymptIQ — AI-powered clinical narrative platform for symptom intelligence [Demo](#) | [Source Code](#)
React, Node.js, PostgreSQL, Gemini, Pinecone, RAG Provides symptom tracking, AI-generated clinical summaries, healthcare insights, doctor-ready reports, and a RAG-based clinical copilot.

Bytrix — File compression/conversion with AI summaries, reducing file size by 40% [Source Code](#)
Next.js, Django, PostgreSQL, Redis Scalable platform for converting and compressing documents (PDF, DOCX, XLSX→CSV) with instant AI-generated summaries.

Employrix — Full-stack job listing portal for posting and managing applications [Demo](#) | [Source Code](#)
Next.js, Node.js, Express.js, PostgreSQL, Redis Supports role-based dashboards, secure job applications, and scalable REST APIs with improved response efficiency by 20%.

Certifications

- HackerRank Certified: [Python](#), [JavaScript](#), [React](#)
- AWS Certified: [Cloud Quest](#), [Artificial Intelligence Practitioner](#), [Cloud Practitioner Essentials](#)

Technical Skills

Languages	Python, JavaScript, Java, C/C++, SQL
Backend	FastAPI, Django, Node.js, Express.js, OOP
Frontend	React.js, HTML, CSS
Databases	PostgreSQL, MySQL, Redis
Messaging	Kafka, Mirth Connect, HL7
DevOps	Docker, Git, GitHub
Tools	VS Code, Postman, PyCharm, Android Studio
OS	Windows, Linux

Education

2024 – present	Master's, Graphic Era University	CGPA: 7.97/10
2021 – 2024	Bachelor's, Graphic Era University	CGPA: 8.08/10
